Minase Fikadu

Software Engineer | Data Scientist

ds.minasefikadu@gmail.com LinkedIn GitHub

SUMMARY

Full-Stack Developer with 2 years of hands-on experience in Software Engineering and Data Science. Seeking opportunities to apply analytical skills in a dynamic organization to drive impactful data-driven decisions and insights.

EDUCATION

Bachelor of Software Engineering, *Addis Ababa Science and Technology University* — Oct 2019 – Jul 2024
Addis Ababa, Ethiopia
Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence, Machine Learning, Object Oriented Programming, Cloud Computing, Distributed Systems, Operating Systems, Database Systems

Data Structures and Algorithms, *Africa to Silicon Valley* — Dec 2022 – Sep 2023
Completed an intensive year-long training focused on solving complex algorithmic problems.

SKILLS

Languages (Python, JavaScript, Golang, Java, C++, Rust, SQL)

Frameworks/Libraries (Node, Express, React, Django, Gin(Go), Numpy, Pandas, Matplotlib, Scikit Learn, Pytorch,Pytorch Lightning, Flask, FastAPI)

Tools (Git/GitHub, Docker, Sentry, Grafana, Azure, Kubernetes, Redis)

PROFESSIONAL EXPERIENCE

Software Developer, *Careit* — Jan 2025 – Present
Alberta, Canada
- Worked on optimizing database operations done in user dashboards by 83% making load time faster and the website smoother.
- Utilized Node.js to build a real time collaboration document editor.
- Wrote foundational test cases to increase test coverage in the codebase.

Software Developer, *The Quick Company* — Mar 2022 – Dec 2024
Dubai, United Arab Emirates
- Integrated Redis into the backend infrustructure to reduce load time of product and inventory fetches.
- Utilized Grafana to add observability to the codebase.
- Worked on integrating SquareSpace into the inventory management system.

PROJECTS

Gradients.io, *Svelte | Bun | Typescript* — Oct 2025 – Present
- Built a decentralized ML fine-tuning platform (SvelteKit, TypeScript) with S3 dataset management, Hugging Face integration, and Stripe billing for on-demand LLM/image model training
- Developed a real-time tournament leaderboard for Bittensor miners with D3 visualizations tracking quality scores, success rates, and network-wide performance metrics
- Designed task orchestration APIs supporting SFT, DPO, and GRPO training workflows with dynamic cost estimation and automated artifact management

Eskalate, *React | Next.js | Node.js* — Nov 2024 – May 2025
- Developed and deployed a full-stack talent-matching platform using React, Node.js, and Next.js, enabling seamless candidate–employer connections.
- Implemented efficient matching algorithms and responsive UI to optimize user experience and improve match accuracy.
- Collaborated with a cross-functional team to design scalable architecture and deliver production-ready features on time.
